IDEA ROUND

Understanding the Need

Clearly define the real-world problem your project addresses. Focus on the pain points, inefficiencies, or unmet needs that exist today — and quantify the problem's scale where possible.

01

Current Challenges

What existing solutions fall short, and what gap remains unaddressed today?

02

User Impact

Who is affected by this problem, and how does it show up in their daily experience?

03

Market Relevance

Why is now the right time to solve this?
What trends make it urgent?

Team Name: _____

The Proposed Solution

Present your idea as the answer to the problem. Give a high-level overview that captures the essence of your solution and its core value proposition.

- **What it is:** A brief, clear description of your product, service, or prototype.
- **How it helps:** Explain how it directly solves the problem you defined earlier.
- **Key benefit:** The single strongest, most unique advantage it offers users.

Use this space for a screenshot, mockup, or architecture snapshot.

How It Works

Walk the judges through the mechanics of your solution — the workflow, architecture, or algorithm that makes your idea function end to end.

01

User Interaction

Describe the user journey and key touchpoints with your solution.

02

Core Logic

Explain the main steps or algorithms behind the system's operation.

03

Data Flow

Illustrate how information moves through your system end to end.

TECH STACK

Hardware (if any)

Team Name: _____

Key Features & Innovation

Highlight what makes your project unique and stand out from existing solutions — focus on the aspects that create real, defensible value.

01

Unique Selling Points

What specific functionality or design choices set you apart from alternatives?

02

Technological Edge

Are you leveraging a novel approach, model, or cutting-edge technology?

03

User Experience

How does your solution offer a simpler or more intuitive experience?

Feasibility & Impact

Feasibility & Viability

- Analysis of the technical and operational feasibility of the idea
- Potential challenges and risks in building or scaling it
- Strategies planned for overcoming these challenges

Impact & Benefits

- Target audience and how their lives or work improve
- Scalability — how the solution grows and adapts over time
- Broader social, economic, or environmental benefit

Beyond the Hackathon

Future scope, roadmap, and your closing statement.

01

Next Steps

Short-term goals and immediate actions right after the hackathon.

02

Scalability

How the project can expand to meet demand or add new features.

03

Long-Term Vision

The ultimate impact and future possibilities of your idea.

Formatting Guidelines

Please make sure the following points are met before uploading your idea PPT.

- 01 Please ensure that all the provided content and headings are included. The formatting and layout should remain the same.
- 02 Keep the presentation within the 8-slide limit (including the title slide).
- 03 Avoid long paragraphs present your idea using bullet points, diagrams, and simple visuals.
- 04 Keep explanations precise, specific, and easy for judges to follow at a glance.
- 05 Export and upload your final file in the format specified in the event guidelines.

Note: Delete this guidelines slide before your final submission.
